## AirCheck™ Wi-Fi Tester

*Wireless troubleshooting made simple  
in a dedicated handheld tool.*

Wi-Fi is a complex technology, but testing it doesn't have to be. The AirCheck™ Wi-Fi tester allows everyone to quickly verify and troubleshoot 802.11 a/b/g/n networks.

*Designed specifically for dispatched troubleshooting,  
AirCheck simplifies wireless testing by providing:*

- Streamlined, guided troubleshooting with just a few clicks
- Instant access to required test results for network availability, connectivity, utilization, security settings, rogue hunting, and interference detection

Its intuitive design makes it simple for anyone to quickly master. Instant power-up and streamlined tests give answers in seconds let you close trouble tickets faster – making technicians and users alike more productive. Easily manage test results and documentation using the included AirCheck Manager software. From start to finish, AirCheck helps take the guesswork out of everyday wireless troubleshooting.

### Features:

- Dedicated, handheld 802.11 a/b/g/n wireless network tester with instant-on technology
- Rapidly perform a wireless discovery to fully assess your current wireless security settings and network availability
- See wireless network utilization by channel and quickly determine if it is 802.11 traffic or non-802.11 interference
- Robust and in-depth WLAN connection tests - from probing to DHCP request to ping
- Quickly identify and locate wireless access points whether authorized or rogue
- Fully document your troubleshooting session thus enabling fast trouble ticket resolution or problem escalation

**Includes:** Tester; USB cable; soft case; CD with software and user manual.
